

EXFIL® BALLISTIC / SL

EXFIL® CARBON / LTP

EXFIL® MARITIME LINER SYSTEM

The EXFIL® Maritime Liner System features sealed Zorbium® pads designed to withstand routine exposure to water. The liner's quick-drying capability helps reduce the added helmet system weight and discomfort that results from waterlogged helmet pads, and the included fit adjustment pack helps customize fit.

PERFORMANCE STANDARDS

- Each EXFIL® helmet maintains its published performance standards and certifications when the EXFIL® Maritime Liner System is installed. See your respective helmet user guide for details.

COMPATIBILITY

- Available in two configurations compatible with either the EXFIL® Ballistic and EXFIL® Ballistic SL, or the EXFIL® Carbon and EXFIL® LTP.
- Compatible with all common styles of communications headsets

WEIGHT

- 113 g (0.25 lb)
- The EXFIL® Maritime Liner System is 20% lighter than the standard Zorbium® liner when dry and up to 50% lighter when wet depending on the helmet system.

SIZING

- > Select the appropriate EXFIL® Maritime Liner System for your EXFIL® helmet type and size.
