# EXFIL® LTP IMPACT LINER AND COMFORT PADS

The EXFIL® LTP Impact Liner contains three (3) hard foam pads covered in coyote brown loop fabric and reduces the risk of head injury from blunt impacts to the helmet. Six modular comfort pads in various shapes help the helmet conform to the head size and shape of the operator and eliminate "hot spots."

## COMPATIBILITY

Impact liner pads install directly into the EXFIL® LTP helmet shell interior by attaching the loop fabric on the back of the pads to the hook discs adhered to the shell surface. Comfort pads attach to the impact liner via the hook patch on the back of each pad. The size 1 and size 2 EXFIL® LTP helmet shells have corresponding impact liner sizes; the included comfort pad set is a single size that fits both shells.

## WEIGHT

- |  |                    |
|--|--------------------|
| ➤ Size 1 (Impact Liner Only)           | 89.1 g (0.196 lb)  |
