

TEAM WENDY® EXFIL® MARITIME RESCUER

Purpose-built for water rescue operations and commonly worn by AST rescue swimmers, the EXFIL® Maritime Rescuer helmet delivers uncompromising performance in wet environments. Its advanced liner system features water-resistant, quick-drying materials and sealed Zorbium® pads to reduce weight and absorb blunt impacts—backed by years of TBI prevention research. A sport-style chin strap ensures a low-profile, secure fit that won't interfere with SCBA use, while mission-ready features keep rescuers safe, seen, and fully equipped for marine response.
